## Conference objectives

After the great success of the first edition organized in 2019, the Laboratory of Bioinformatique, Microbiologie Appliquée et Biomolécules-BMAB (Bioinformatics, Applied Microbiology and Biomolecules) organizes the 2nd International Conference on Bioinformatics, which will be held on 13 & 14 November 2024 in M'hamed Bougara University, Boumerdès, Algeria. The ICB24 is a scientific meeting which covers all subjects of research and development on OMICS sciences and Bioinformatics.

The International Conference on Bioinformatics ICB24 will enhance the cornucopia of knowledge of all the participants in different fields as genomics, proteomics, transcriptomics, metabolomics, multiomics and structural bioinformatics, and will be focused on Bioinformatics use in OMICS sciences.

The ICB24 will be a mixture of eminent speakers, industry professionals and students. Discussing on various imperative topics will add an insight to ponder and confer over crux of today's scientific and technological perk up.

Our international Conference on Bioinformatics (ICB24) attracts national and international participants working in diverse OMICS sciences and Bioinformatics.

Conferences will be given by eminent speakers and the participants will contribute to the success of our seminar through posters.

## TOPICS

Papers on all aspects coupling OMICS sciences and bioinformatics are welcome.

### The main topics are:

- ✓ Genomics and Bioinformatics.
- ✓ Proteomics and Bioinformatics.
- ✓ Transcriptomics and Bioinformatics.
- ✓ Metabolomics and Bioinformatics.
- ✓ Multiomics and Bioinformatics.
- ✓ Structural Bioinformatics.
